

Subject information sheets arranged in the sequence of compulsory, compulsory optional and optional subjects according to the recommended study plan of the full-time study form

Study program: **Didactics of technical professional subjects**

Field of study: **Teaching and pedagogical sciences**

Degree of study: **Third**

List of subjects

Compulsory subjects

- Dissertation exam
- Dissertation project
- Educational psychology
- Innovations in union technical specializations
- Methodology of pedagogical research
- Modern directions in didactics
- Defence of the dissertation
- Technology and humanization
- Theory and policy of vocational education
- Research in union didactics

Compulsory electives and optional subjects

- Current issues of school management
- College didactics
- ICT in vocational education
- Neurodidactic aspects of education
- Professional education and the labour market
- Development of critical and creative thinking
- Membership in the organizing committee of the conference
- Published paper from the domestic scientific conference
- Published contribution from a foreign scientific conference
- Participation in the solution of the research project
- Scientific text in domestic publications of category A
- Scientific text in foreign publications of category B
- Performance of the specified pedagogical activity

SUBJECT INFORMATION SHEET

University: DTI University										
Faculty:										
Subject code: DTPP-101	Subject name: Dissertation exam									
Type, scope and method of educational activities										
Subject type (P, PV, V): P										
Recommended scope of teaching P-S-C/L:										
Study method:										
Form of study: full-time										
Number of credits: 10										
Recommended semester of study: 3.										
Degree of study: 3rd										
Conditional subjects: they are not										
Conditions for passing and completing the course:										
Method of evaluation and completion of study of the subject: state examination										
Interim evaluation:										
-Final evaluation: Positive evaluation of the written work by the opponent and its recommendation for defense. Successful defense of the written work.										
Learning outcomes (performance standard):										
The student demonstrates the ability to create and defend a methodology for solving a dissertation through the defense of a written work for the dissertation exam, thus demonstrating orientation in the problem being solved, presenting its current state based on theoretical starting points and presenting the aim of his scientific research activity.										
Brief outline of the subject (content standard):										
The defense of the written work for the dissertation exam is public. Its course is usually as follows:										
- opening,										
- presentation of a doctoral student,										
- the doctoral student's presentation of the content of the written work with an emphasis on a detailed description of the research purpose of the dissertation, including the expected contribution to the development of professional didactics (didactics of technical professional subjects),										
- presentation of the opponent's review and trainer's statement,										
- the doctoral student's opinion about the comments of the opponent and supervisor,										
- - discussion.										
Recommended literature:										
Language, which is necessary to pass the course: Slovak language

SUBJECT INFORMATION SHEET

University: DTI University	
Faculty:	
Subject code: DTPP-102	Subject name: Dissertation project
Type, scope and method of educational activities	
Subject type (P, PV, V): P	
Recommended scope of teaching P-S-C/L:	
Study method: combined	
Form of study: full-time	
Number of credits: 10	
Recommended semester: 5.	
Degree of study: 3rd	
Prerequisite subjects: Dissertation exam	
Conditions for completing the subject:	
Method of evaluation and completion of study of the subject: credit	
Interim evaluation: -	
Final evaluation: based on project work	
The student will design and apply a new methodology, or make a solution to a research problem in the required scope.	
In order to obtain a credit and to assign credits, it is necessary to achieve at least 51 points out of 100 in the project work. To obtain an evaluation A: 100-91 points, B 90-81 points, C: 80-71 points, D: 70-61 points, E: 60-51 points.	
Learning outcomes (performance standard):	
After successfully completing the course, the student will acquire the following knowledge and skills:	
- create a methodology for solving the dissertation,	
- to defend the methodology of solving the dissertation,	
- - present the results of work on the project.	
Brief outline of the subject (content standard):	
1.-11. Processing of documents for the solved research problem and preparation of documentation for the implemented solution in the scope of at least 30 pages.	
12. Presentation of the results at the workplace seminar.	
Recommended literature:

SUBJECT INFORMATION SHEET

University: DTI University	
Faculty:	
Code: DTPP-103	Name: Educational psychology
Type, scope and method of educational activities	
Subject type (P, PV, V): P	
Recommended scope of teaching P-S-C/L: 2-0-0-0 / week	
Study method: combined	
Form of study: full-time	
Number of credits: 10	
Recommended semester: 1.	
Degree of study: 3rd	
Conditional subjects: no	
Conditions for completing the subject:	
Method of evaluation and completion of study of the subject: exam	
Continuous evaluation: participation in compulsory education	
Final evaluation: based on the exam.	
Attending lectures. Elaboration of a seminar work in the range of 5-10 pages on a topic determined and related to the issue. In the case of a dissertation on educational psychology, the development of a part of the theory for the dissertation. In order to receive a rating and to be awarded credits, it is necessary to achieve at least 51 points out of 100 in the exam. To receive a rating A: 100-91 points, B: 90-81 points, C: 80-71 points, D: 70-61 points, E : 60-51 points.	
Learning outcomes (performance standard):	
Based on lectures and self-study, the student should master, theoretically know, the concepts of educational psychology, its definition. He should understand the processes of education in the emotional, motivational, communication, socialization, value, self-regulation and creative areas. In practice, based on the theory and methodology of educational psychology, he should be able to implement and evaluate the mentioned educational programs, including preventive programs.	
Brief outline of the subject (content standard):	
<ol style="list-style-type: none"> 1. Concept of educational psychology 2. Theories of educational psychology 3. Cognitive, meta-cognitive and non-cognitive personality development 4. Emotional Education 5. Motivational education 6. Socialization education 7. Conversation, communication in education 8. Value, axiologising education 9. Self-regulation 10. Education for Creativity 11. Resilience and positive psychology 12. Self-concept

SUBJECT INFORMATION SHEET

University: DTI University	
Faculty	
Code: DTPP-104	Name: Innovations in union technical specializations
Type, scope and method of educational activities	
Subject type (P, PV, V): P	
Recommended scope of teaching P-S-C/L: 2-0-0-0 / week	
Study method: combined	
Form of study: full-time	
Number of credits: 10	
Recommended semester: 2.	
Degree of study: 3rd	
Conditional subjects: no	
Conditions for completing the subject:	
Method of evaluation and completion of the study of the subject: exam	
Continuous evaluation: participation in compulsory education	
Final evaluation: semester paper	
To obtain a grade and assign credits, it is necessary to achieve at least 51 points out of 100 on the exam. To obtain an A grade: 100-91 points; B: 90-81 points; C: 80-71 points; D: 70-61 points; E: 60-51 points.	
Learning outcomes (performance standard):	
The student will gain an overview of innovations in the areas of the component base, modern materials, electronic devices, semiconductor converters, and electrical machines, as well as measuring instruments and their use. He should also understand their potential opportunities when studying professional, especially in electrical engineering subjects.	
Brief outline of the subject (content standard):	
<ol style="list-style-type: none"> 1. Use of computer peripherals and their equipment, trends in their rational innovation from the point of view of performance, reliability and reduction of energy consumption. 2. The development of sound and image processing, and the importance of the transition to digital technologies. 3. Progress in the field of electrotechnical, electronic, semiconductor and magnetic materials. 4. New passive and active components for electronic and power applications. 5. Innovative trends in the field of electronics, power electronics and their applications. 6. New methods of cooling electrical and electronic devices. 7. Modern directions of development of electrical machines and drive systems. 8. Innovations in the field of production, conversion and efficient use of electrical energy. 9. New measuring instruments, oscilloscopes, analyzers, their meaning, use and benefit. Computer-aided measurement systems, remote measurement systems. 10. Electromagnetic compatibility and reliability of modern devices. 11. Simulation tools and their use in technical fields. 12. Modern sources of technical and company information, meaning from the point of view of an expert and an ordinary user.

SUBJECT INFORMATION SHEET

University: DTI University	
Faculty:	
Code: DTPP-105	Name: Methodology of pedagogical research
Type, scope and method of educational activities	
Subject type (P, PV, V): P	
Recommended scope of teaching P-S-C/L: 2-0-0-0 / week	
Study method: combined	
Form of study: full-time	
Number of credits: 10	
Recommended semester: 2.	
Degree of study: 3rd	
Conditional subjects: no	
Conditions for completing the course:	
Method of evaluation and completion of the study of the subject: exam	
Continuous evaluation: participation in compulsory education	
Final assessment: semester paper	
The student will prepare a semester thesis in the form of literary research, which will be the starting chapter for the dissertation.	
To receive a rating and assign credits, it is necessary to achieve at least 51 points out of 100 in the exam. To receive a rating A: 100-91 points, B 90-81 points, C: 80-71 points, D: 70-61 points, E: 60-51 points.	
Learning outcomes (performance standard):	
After successfully completing the course, the student will acquire the following knowledge and skills:	
<ul style="list-style-type: none"> - describe basic research methods and techniques, - implement research methods and techniques in solving specific research problems, - characterize the current state in the field of methodology of educational sciences, - plan, organize and evaluate research in the didactics of technical professional subjects. 	
Brief outline of the subject (content standard):	
<ol style="list-style-type: none"> 1. Concept of the methodology of educational sciences. 2.-3. Quantitative and qualitative methodologies of educational sciences. 4. Types of educational research. 5.-6. Planning and process of quantitative research. 7. Measurement and scales in educational sciences. 8.-9. Validity and reliability of research. 10. Bibliographic references in research. 11.-12. Knowledge of the current state of the problem (literary research).

Recommended scope of teaching P-S-C/L:	
Study method: combined	
Form of study: full-time	
Number of credits: 10	
Recommended semester: 1.	
Degree of study: 3rd	
Conditional subjects: no	
Conditions for completing the course:	
Method of evaluation and completion of study of the subject: exam	
Interim evaluation: active participation in compulsory education	
Final evaluation: The student must complete the set number of hours and actively participate in discussions - workshops during the seminars. Through his activity, he demonstrates that he studies the given subject systematically. Part of his activity is also the preparation of a 10-page thesis - the thesis should have a comparative nature of two selected didactic areas from the current trends in education. In order to receive a rating and to be awarded credits, it is necessary to achieve at least 51 points out of 100 in the exam. To receive a rating A: 100-91 points, B: 90-81 points, C: 80-71 points, D: 70-61 points, E : 60-51 points.	
Learning outcomes (performance standard):	
After completing the course, the student will master newer trends in the field of general didactics; he will understand modern directions in didactics as a superstructure to general didactics, and he will understand in particular the current tendencies of education, which developed especially at the end of the 20th century and which are currently developing dynamically. With this perception of current and prospective tendencies, he will be able to compare traditional and newer educational management options and will understand the educational process as a process that is no longer perceived as a purely bipolar process of teacher and student, but as a process in which multiple aspects are appreciated, which is being developed by contemporary pedagogy and didactics.	
A graduate of the course will:	
<ul style="list-style-type: none">- understand the management of education as a process in which, unlike in the past, the teacher's creative approaches to education are emphasized,- to combine education with neuro-pedagogical and neuro-dialectic aspects of teaching, so that the educational process is truly effective,- understand the evaluation of education and apply it in connection with the self-reflection of one's educational activity,- master newer educational concepts and present their contribution to the effectiveness of education	
Brief outline of the subject (content standard):	
<ol style="list-style-type: none">1. Didactics, possibilities and areas of its modernization. Areas of modernization.2. Concepts of teaching in the 20th century and their contribution to education.3. Taxonomy of educational aims.4. Students' learning styles5. Evaluation of the educational process.6. Activating teaching methods - methods according to Schmidt and other authors.7. Constructivist concept of teaching.8. Neuro-pedagogy and neuro-didactics and their impact on education.9. Psychodidactics and metacognition in education.	

10. Cognitive education and related aspects.
11. Newer concepts of education - EUR, project teaching, mastery learning, education and quality of life of the pupil.
12. Seminar – workshop – conclusion to the subject Modern directions in didactics.

SUBJECT INFORMATION SHEET

University: DTI University	
Faculty:	
Code: DTPP-107	Name: Obhajoba dizertačnej práce
Type, scope and method of educational activities	
Subject type (P, PV, V): P	
Odporučaný rozsah výučby P-S-C/L:	
Study method: combined	
Form of study: full-time	
Number of credits: 25	
Recommended semester: 6.	
Degree of study: 3rd	
Conditional subjects: no	
Conditions for completing the course:	
Method of evaluation and completion of study of the subject: štátnej skúšky, klasifikácia oponentom ZP, klasifikácia oponentom ZP, klasifikácia oponentom ZP	
Interim evaluation:	
Final evaluation: Successful defence of work. If the dissertation is evaluated by one opponent with the classification grade FX, the student has the right to defend the thesis. If it is evaluated by several opponents with a classification level of FX, the defence can be carried out only after the deficiencies mentioned in the evaluation have been removed and the dissertation has been re-evaluated by already approved opponents.	
Successful defence of work.	
Learning outcomes (performance standard):	
With his dissertation, the doctoral student demonstrates that he has the ability to search for information, scientifically process it and constructively evaluate it, he is oriented in the researched issue, knows the ethics of scientific work, scientifically interprets and confronts new data with theory.	
Brief outline of the subject (content standard):	
The dissertation represents the final thesis of the 3rd degree of university studies. The content of the dissertation is focused on the didactics of technical subjects.	
The dissertation must exhaustively analyze the theoretical basis of the treated topic and contain relevant research on the issue being addressed. The dissertation must bring new perspectives to the researched area, thereby contributing to the enrichment of educational theory, practice, methodology and the profession. At the same time, it may raise the need to solve other issues related to the topic. The thesis must meet the requirements for the final theses of the doctoral study program in terms of content, language and formality.	
The defense of the dissertation is public. Its course is usually as follows:	
<ul style="list-style-type: none">- opening,- presentation of a doctoral student,- presentation of aims, achieved results and contribution to doctoral students,- evaluation of the fulfillment of the doctoral student's individual study plan by the supervisor in the form of an evaluation,- presentation of opponent's reviews,- the doctoral student's opinion on the opponents' comments, discussion.

SUBJECT INFORMATION SHEET

University: DTI University	
Faculty:	
Code: DTPP-108	Name: Technology and humanization
Type, scope and method of educational activities	
Subject type (P, PV, V): P	
Recommended scope of teaching P-S-C/L:	
Study method: combined	
Form of study: full-time	
Number of credits: 6	
Recommended semester: 4.	
Degree of study: 3rd	
Conditional subjects: no	
Conditions for completing the course:	
Method of evaluation and completion of study of the subject: exam	
Interim evaluation: active participation in compulsory education	
Final evaluation: Elaboration of a 15-page seminar thesis on the topic of the specified and relevant issue. Oral examination. A score of at least 51 out of 100 is required to be graded and awarded credits.	
Grading scale: A= 100-91 b, B= 90-81 b, C= 80-71 b, D= 70-61 b, E= 60-51 b.	
Learning outcomes (performance standard):	
Graduates of this course will acquire knowledge and experience in the field of humanizing technical equipment. They learn the meaning and content of the most important human parameters of technical equipment, the aims and methods of their research, as well as their use in the teaching of technical professional subjects. They will learn ways to optimize work systems (man - technology).	
Brief outline of the subject (content standard):	
1. Humanization of technology (causes, principles and aims). 2. Man and his characteristics as a starting point in the design of new technologies. 3. Psycho-physiological and energy parameters of a person and their use in the operation of technical equipment. 4. Methods of optimizing interactions between people and technology, creation of work systems. 5. Requirements for safe and efficient use of technical equipment by humans. 6. Human requirements for effective and safe use of information technologies in technical practice. 7. Requirements for the humane creation of workplaces and resting places with technical facilities (dimensional and spatial solutions). 8. Human requirements for notification and control elements of technical devices. 9. Human requirements for tools and equipment. 10. Human requirements for the environment, case studies (acoustic, optical, climatic and dusty environment). 11. Human requirements for the environment, case studies (biological, chemical and psycho-social environment). 12. Human requirements for work organization, case studies.

SUBJECT INFORMATION SHEET

University: DTI University	
Faculty:	
Code: DTPP-109	Name: Theory and policy of vocational education
Type, scope and method of educational activities	
Subject type (P, PV, V):P	
Recommended scope of teaching P-S-C/L:	
Study method: combined	
Form of study: full-time	
Number of credits: 7	
Recommended semester: 3.	
Degree of study: 3rd	
Conditional subjects: no	
Conditions for completing the course:	
Method of evaluation and completion of study of the subject: credit	
Interim evaluation: participation in compulsory education	
Final evaluation:	
The student will prepare a semester thesis in the form of a literary research, which will be the starting chapter for the dissertation.	
In order to obtain an evaluation and to assign credits, it is necessary to achieve at least 51 points out of 100 on a graded course. To obtain an evaluation A: 100-91 points, B 90-81 points, C: 80-71 points, D: 70-61 points, E : 60-51 points.	
Learning outcomes (performance standard):	
After successfully completing the course, the student can, based on the acquired knowledge and skills:	
<ul style="list-style-type: none"> - Describe the essence of school policy; - Define the tasks and aims of professional education; - Define the problems of current vocational education in Slovakia and the EU; - Define the role of the state educational program in vocational education; - Define the role of the school educational program in vocational education. 	
Brief outline of the subject (content standard):	
<ol style="list-style-type: none"> 1. School policy, its definition, subject and tasks 2. Model of professional education in Slovakia 3. Professional education in EU documents 4. Lisbon strategy and professional education 5. Lisbon Strategy Europe 2020 meaning and aims 6. Standard of vocational education and training in Slovakia 7. Control in education – financial control and the State School Inspection 8. Professional and pedagogical competence of teaching staff 9. School administration and its role in school management 10. Current state and problems in the central management of education. 11. Management and administration of secondary education - current state and problems of management. 	
Recommended literature:

SUBJECT INFORMATION SHEET

University: DTI University	
Faculty:	
Code: DTPP-110	Name: Research in union didactics
Type, scope and method of educational activities	
Subject type (P, PV, V): P	
Recommended scope of teaching P-S-C/L:	
Study method: combined	
Form of study: full-time	
Number of credits: 7	
Recommended semester: 4.	
Degree of study: 3rd	
Conditional subject: Methodology of pedagogical research	
Conditions for completing the course:	
Method of evaluation and completion of study of the subject: exam	
Interim evaluation: participation in compulsory education	
Final evaluation: Preparation of a written work (40–50 pages) for the dissertation exam with theses, subject and objectives of the dissertation. In order to receive an evaluation and to assign credits, it is necessary to achieve at least 51 points out of 100 in the defense of the research project within the dissertation exam.	
Evaluation: A: 100-91 points, B 90-81 points, C: 80-71 points, D: 70-61 points, E: 60-51 points.	
Learning outcomes (performance standard): The student can design a research methodology, create research tools, carry out quantitative pedagogical research, analyze and interpret research results, propose recommendations for theory and practice.	
Brief outline of the subject (content standard): 1. Analysis of the current state of issues in research in trade didactics. 2. Research methodology in trade didactics as part of the dissertation. 3. Organization of research in trade didactics as part of the dissertation. 4. Selection of a sample of research in trade didactics. 5. Creation of research tools in research in trade didactics: questionnaires, attitude scales, etc. 6. Creation of research tools in research in trade didactics: didactic tests, etc. 7. Pilot verification of research methodology in trade didactics. 8. Realization of quantitative pedagogical research in trade didactics, which is part of the dissertation. 9. Processing of research results in trade didactics. 10. Interpretation of research results in trade didactics. 11. Recommendations for theory and practice within the framework of research in trade didactics. 12. Writing a dissertation as part of research in trade didactics.

SUBJECT INFORMATION SHEET

University: DTI University	
Faculty:	
Code: DTPP-201	Name: Current issues of school management
Type, scope and method of educational activities	
Subject type (P, PV, V): PV	
Recommended scope of teaching P-S-C/L: 1-0-0-0 /week	
Study method: combined	
Form of study: full-time	
Number of credits: 5	
Recommended semester: It is recommended to complete two compulsory optional subjects in each year of study in the full-time form of study, and in the external form of study it is recommended to complete three compulsory optional subjects in the 2nd and 3rd year of study.	
Degree of study: 3rd	
Conditional subjects: no	
Conditions for completing the course:	
Method of evaluation and completion of study of the subject: credit	
Interim evaluation: participation in compulsory education	
Final evaluation:	
The student will prepare a semester thesis in the form of a literary research, which will be the starting chapter for the dissertation.	
In order to obtain an evaluation and to assign credits, it is necessary to achieve at least 51 points out of 100 on a graded course. To obtain an evaluation A: 100-91 points, B 90-81 points, C: 80-71 points, D: 70-61 points, E : 60-51 points.	
Learning outcomes (performance standard):	
After successfully completing the course, the student can, based on the acquired knowledge and skills:	
<ul style="list-style-type: none"> - Describe the nature and peculiarities of school management, - Characterize school management models, - Explain the understanding of pedagogical management as a cyber system, - Apply legislative frameworks of school management, - Define levels of pedagogical management and subjects of pedagogical management. 	
Brief outline of the subject (content standard):	
1. School management and its peculiarities	
2. School management model	
3. School management – micro level	
4. School management – macro level	
5. Principles of pedagogical management of the school	
6. Control in education – financial control and the State School Inspection	
7. Professional and pedagogical competence of teaching staff	
8. School administration and its role in school management	
9. Current state and problems in the central management of education.	
10. Management and administration of secondary education - current state and problems of management

SUBJECT INFORMATION SHEET

University: DTI University	
Faculty:	
Code: DTPP-204	Name: Neurodidactic aspects of education
Type, scope and method of educational activities	
Subject type (P, PV, V): PV	
Recommended scope of teaching P-S-C/L: 1-1-0-0 /week	
Study method: combined	
Form of study: full-time	
Number of credits: 5	
Recommended semester: It is recommended to complete two compulsory optional subjects in each year of study in the full-time form of study, and in the external form of study it is recommended to complete three compulsory optional subjects in the 2nd and 3rd year of study.	
Degree of study: 3rd	
Conditional subject: Educational psychology	
Conditions for completing the course:	
Method of evaluation and completion of study of the subject: credit	
Interim evaluation: active participation in compulsory education	
Final evaluation: Attending lectures and writing a 10-page thesis. The written work will be focused on the application of the neurodidactic aspects of the studied field.	
In order to receive an evaluation and to assign credits, it is necessary to achieve/obtain at least 51 points out of 100 on a graded credit. To receive an evaluation A: 100-91 points, B 90-81 points, C: 80-71 points, D: 70-61 points , E: 60-51 points.	
Learning outcomes (performance standard):	
After completing the study of the mentioned subject, it is assumed that the student will master the innovative aspects of education, which are based on the latest theories related to neurodidactic perspectives on education. The student will acquire the principles of education based on neuroscience, which emphasizes the reality that learning is not based on repetition of the curriculum, as emphasized by the classical teaching theory, but learning is a complex neuroprocess that supports the growth of synapses.	
In the sense of the above, it is assumed that the student will learn to manage the educational process in accordance with the principles of neuroscientific perspectives, which emphasize the significant involvement of the brain in the processes of learning and cognition. In the mentioned concept, newer approaches to the learner's creativity are also emphasized. Part of the study is also a realistic view of the issue of using ICT in the education process, because its excessive and ill-advised use can lead to digital dementia.	
Brief outline of the subject (content standard):	
1. Innovative tendencies in the education of the 21st century. 2. Neuropedagogy and neuropedagogy - newer approaches to education. 3. The human brain - its construction, development and functions. 4. The human brain - its activities in various situations - learning, experiencing emotions, stress, burnout syndrome. 5. Comparison of classical education and education from the point of view of neuropedagogy. 6. Brain and education - the importance of motivation in the educational process. 7. Principles of neurodidactic education. 8. Emotions and education. 9. Concept maps and education - an important area of neuropedagogy. 10. Neurodidactic aspects of student evaluation. 11. Digital dementia - reality or unnecessary fears. 12. Summary and systematization of the content of the subject matter.

SUBJECT INFORMATION SHEET

University: DTI University	
Faculty:	
Code: DTPP-205	Name: Professional education and the labor market
Type, scope and method of educational activities	
Subject type (P, PV, V): PV	
Recommended scope of teaching P-S-C/L:	
Study method: combined	
Form of study: full-time	
Number of credits: 5	
Recommended semester: It is recommended to complete two compulsory optional subjects in each year of study in the full-time form of study, and in the external form of study it is recommended to complete three compulsory optional subjects in the 2nd and 3rd year of study.	
Degree of study: 3rd	
Conditional subjects: no	
Conditions for completing the course:	
Method of evaluation and completion of study of the subject: credit	
Interim evaluation: participation in compulsory education	
Final evaluation: The student will prepare a semester thesis in the form of a literary research, which will be the starting chapter for the dissertation. To receive an evaluation and to assign credits, it is necessary to achieve at least 51 points out of 100 on a graded credit. To receive an evaluation A: 100-91 points, B 90-81 points, C: 80-71 points, D: 70-61 points, E : 60-51 points.	
Learning outcomes (performance standard): After successfully completing the course, the student can, based on the acquired knowledge and skills:	
<ul style="list-style-type: none"> - Describe the essence of employment policy - Define the tasks of lifelong and credit education - Define the requirements for professional and pedagogical competence in vocational education - Define the principles of partnership and cooperation of the employer sphere and professional education - Define the role and importance of the National Qualification System - Define and understand the importance of certification in vocational education 	
Brief outline of the subject (content standard):	
<ol style="list-style-type: none"> 1. Employment policy and its role 2. Labor market – definition and characteristics 3. Further education of teaching staff 4. Lifelong education of teaching staff 5. Lisbon Strategy Europe 2020 meaning and aims 6. Pedagogical and professional competence of teaching staff 7. Career counseling and its importance in professional education 8. Cooperation between employers and schools in school legislation 9. National qualification system and its meaning 10. Education documents and certification in vocational education 11. – 12. Programs to support labor force mobility in vocational education

SUBJECT INFORMATION SHEET

University: DTI University	
Faculty:	
Code: DTPP-206	Name: Rozvoj kritického a tvorivého myslenia
Type, scope and method of educational activities	
Subject type (P, PV, V): PV	
Recommended scope of teaching P-S-C/L: 0-2-0-0 /week	
Study method: combined	
Form of study: full-time	
Number of credits: 5	
Recommended semester: It is recommended to complete two compulsory optional subjects in each year of study in the full-time form of study, and in the external form of study it is recommended to complete three compulsory optional subjects in the 2nd and 3rd year of study.	
Degree of study: 3rd	
Conditional subjects: no	
Conditions for completing the course:	
Method of evaluation and completion of study of the subject: credit	
Interim evaluation: participation in compulsory education	
Final evaluation:	
1. Theoretical development of a selected issue of creative or critical thinking in the scope of 20 standard pages and creation of a concept map for the developed issue - minimum 15 points, maximum 30 points. 2. Venn diagram of differences and similarities of critical and creative thinking, - minimum 15 points, maximum 30 points. 3. Performance didactic test from the content of the subject Development of critical and creative thinking - minimum 20 points, maximum 40 points. At least 50 points out of 100 points must be achieved to receive credit and to be assigned credits. Scale: A: 100-90 points, B: 89-80 points, C: 79-70 points, D: 69-60 points, E: 59-50 points	
Learning outcomes (performance standard):	
The result of education in the mentioned discipline is to theoretically master the basics of critical and creative thinking. The student can analyze and subsequently determine the common and different factors of critical and creative thinking. He can explain which strategies under the conditions of the educational process support the development of critical and creative thinking. On a practical level, he knows how to use one of the strategies for the development of these forms of thinking, namely conceptual mapping, so that he is prepared for the development of critical and creative thinking in his profession.	
Brief outline of the subject (content standard):	
1. Philosophical problem of knowledge. 2. Cognitive psychology and learning. 3. Constructivism, socioconstructivism and sociocognitive theories of learning. 4. Critical thinking. 5. Creative thinking. 6. Self-regulation and metacognition in learning. 7. Education and training for critical and creative thinking. 8. Strategies for developing critical thinking. 9. Strategies for the development of creative thinking. 10. Concept mapping. 11. – 12. Key competencies of a critical and creative thinker.

Teacher: trainer					
Date of last change: 20 June 2022					
Approved by: prof. PaedDr. Ing. Roman Hrmo, PhD., MBA					

SUBJECT INFORMATION SHEET

University: DTI University					
Faculty:					
Code: DTPP-306	Name: Scientific text in foreign publications of B category				
Type, scope and method of educational activities					
Subject type (P, PV, V):PV					
Recommended scope of teaching P-S-C/L:					
Study method: combined					
Form of study: full-time					
Number of credits: 8					
Recommended semester:					
Degree of study: 3rd					
Conditional subject:					
Conditions for completing the course:					
Method of evaluation and completion of study of the subject: credit					
Interim evaluation:					
Final evaluation: Publication of a scientific text within foreign publications of category B focused on the issue of the student's dissertation.					
Learning outcomes (performance standard): Publication of a scientific text within foreign publications of category B focused on the issue of the student's dissertation.					
Brief outline of the subject (content standard): The professional/scientific text is a presentation of the student's ongoing scientific and research results.					
Recommended literature: According to the topic and scientific/professional direction of the contributions.					
Language, which is necessary to pass the course: slovak language					
Notes - student's time: 240 hours
